

gen² 9000

gen² 9000 workstations are a blend of original Steelcase components restored to new condition, and new components, which create a new workstation. We remove all the parts of an original Steelcase panel down to just the frame. From there we build each panel with brand new gen² parts that we manufacture. The finished product is a state of the art gen² 9000 panel that looks just like a brand new Steelcase panel for a fraction of the cost.

gen² 9000 workstations are perfect for accommodating managers, private offices, as well as standard or custom workstation designs. Our gen² panels are available in fabric or glass.

gen² 9000 workstations offer custom made worksurfaces and unique designs that are environmental friendly. You choose your own styles, colors, and finishes, making your 9000 workstation personalized.

Product Characteristics

- Panels- tackable acoustic, 2-1/4" thick
- Worksurfaces- new, 3mm front, 1-1/4" thick
- Pedestals- new, integral pull, FR lock core
- Electrical- 5-wire/3-circuit or 8-wire/4-circuit
- Panels, electrical and overhead storage are original Steelcase

Sustainability

- gen² 9000 Workstations are a sustainable product, consisting of an average of 70% recycled / reused content.

Glass Options

gen² 9000 panels come with several different options when it comes to incorporating glass for a more modern look:

- Glass stacker (also available in frosted and fabric)...great for adding glass to existing panels or when reconfiguration is a must.
- Integrated glass panels...a combination of glass, laminate and fabric based on your design specifications.
- Full glass panels- all sizes available.
